Sibling Issues. Siblings are two or more individuals who share a parent in common. They are referred to as brothers or sisters depending on gender. When it comes to child development, sibling relationships can be incredibly important. Siblings represent a child’s first social network, and these early relationships provide a training ground for social learning and relationship building. Qualified family therapists and other mental health professionals can help individuals work through sibling issues and other family-related challenges.

Understanding Sibling Issues. What Causes Sibling Issues? Family-wide issues are also likely to influence sibling relationships as well. Such factors include: Divorce. Research has shown that sibling relationships often play a major role in how we will interact in other relationships with friends, romantic partners, and others later in life. Parents can play a key role in helping nurture a good sibling relationship and reduce sibling rivalry and conflict. Try to figure out what’s behind the sibling conflicts. Do your kids tend to squabble when one is trying to get the other’s attention? Are they competing for your time and attention? Do they fight more when they are tired or bored? Emphasize what family bonds really mean. Explain to your children and remind them periodically that family, and especially siblings, can be the kind of unshakable love and support that cannot easily be matched.

Sibling Issues Within the Foster or Adoptive Family. Resources for Maintaining Sibling Connections. Sibling relationships are emotionally powerful and critically important not only in childhood but over the course of a lifetime. As children, siblings form a child’s first peer group, and they typically spend more time with each other than with anyone else. Children learn social skills, particularly in sharing and managing conflict, from negotiating with brothers and sisters. Siblings have a shared history, and maintaining their bond provides continuity of identity and belonging. The benefits of keeping brothers and sisters together are most clearly evidenced from the perspectives of youth themselves. Children’s perspective.
