Abstract:

Todd Shimoda, in his book “Excellent communication skills required for Engineering Managers,” illustrates the communication process and presents techniques to improve written, spoken, and interpersonal communication skills. Since civil engineers must communicate with society, their ultimate employer, communication skills are necessary if they expect to be successful. Mr. Shimoda first presents the foundations of communication which involve understanding the communication models and the three communication principles of Topic, Audience, and Objective. Once he has laid these foundations, he presents specific guidelines to improving one's written, spoken, and interpersonal communication skills. With this publication, Todd Shimoda stresses that anyone can improve their communication skills if they understand the basic process of communication and practice the techniques.

Subject Headings: Professional development | Managers | Human factors | Foundations | Publications

Excellent Communication Skills. Confident, articulate, and professional speaking abilities (and experience). Empathic listener and persuasive speaker. Public Speaking. Speaking in public, to groups, or via electronic media. Excellent presentation and negotiation skills. You should include your communication skills indirectly and this is best done through achievements. You would usually only focus on this if the position requires strong communication skills. Remember that you should always include information on your resume that's relevant to the position you're targeting. Including information that’s irrelevant will usually get your resume rejected. If the position asks for good communication skills – There a number of ways to this effectively. Presentations and Public Speaking. Engineering managers require interpersonal skills to be efficient. Without the capability to influence others, produce good decision making and control many preferential, the excellent of technical skills aren't going to dedicate completely to the administrative of the team. As a engineering manager, who realize themselves badly off in interpersonal skill, must try to aspire training at any time to support up leadership skills, human skills, communications skills, management skills, presentation skills and so on. Well communication skills and the intelligence to associate with people are the essential to become a successful engineering manager, or else, they will not be able to express their opinion for the business with the involved person.
